

Large Scale Computing Labs Summer 2025/2026

General

- Labs are to be held in person, consultations may be in person or online.
 - MS Teams used for communication, submitting reports etc.
- Documents, communication, etc. should be in English.
- This document may change upon notice.
- Virus infections, etc.

Labs

1. Topics: Computing infrastructures: supercomputers, clouds, containers.
2. There are 7 labs in the semester.
3. Some of the tasks require basic coding skills in bash/python/javascript etc.
4. Tasks and a report from the previous class should be done in a week. Each participant will upload a report and other results of class to a dedicated MS Teams channel. You may be asked to explain your report during the next class.
5. Each class, except lab01, must result in a report.
6. One unexcused absence is permitted, a report is still required.
7. Each starting (calendar) week of being late with a report results in the max grade decreased by 0.5, until the minimum of 3.0.
8. All reports must be submitted.
9. The report should:
 - a. include a header: name surname, lab number, date,
 - b. argument the process of performing the assigned task, input, output trimmed to a sensible length,
 - c. be in a .docx or .pdf format,
 - d. please attach any source code produced (including scripts!), at the end of the report
10. You are permitted to leave early if the assignment is complete and we're past the half-time of the class. The report may be prepared and delivered later.
